TOOLS / PLATFORMS	GIT Bash, GIT Hub, VS Code, NGINX, CertBot, PostMan, Ubuntu Linux
DATABASES	PostgreSQL, MySQL

PROJECTS / OPEN-SOURCE

SKATE PARK | [LINK](#)

JavaScript ES6+, Express, JWT, PostgreSQL, Handlebars, CSS3, Bootstrap.

Skatepark is a Node.js application using Express, Handlebars, and JWT for authentication. It allows users to register, log in, and view skaters and their details. PostgreSQL is used to store data, and layouts provide a clear structure. The interface is designed with Bootstrap and CSS, offering an intuitive user experience.

BANCO SOLAR | [LINK](#)

JavaScript, Node.js, Express, PostgreSQL, HTML5, CSS3

Banco Solar is a web application developed with Node.js, Express.js, and PostgreSQL to manage transfers between users. It uses a REST API to perform CRUD operations and store data in a relational database. The frontend interacts with the API to display real-time information about users and transactions.

SUPER HERO API | [LINK](#)

JavaScript ES6+, SuperHero API, Bootstrap 5, AJAX, jQuery, HTML y CSS,

The Super Hero API app uses Node.js and Express.js to consume the superheroapi.com API and display information about superheroes. It allows users to search for characters by name and view details such as identity and abilities. Power stats are displayed in an interactive chart using Canvas.js, enhancing the user experience.

LIKEME | [LINK](#)

JavaScript ES6+, Node.js, Express.js, PostgreSQL, Axios, jQuery, Bootstrap, HTML5, CSS3.

Likeme is a social network where users can share images and descriptions, interact with existing posts through "likes," and discover content from other users. The application is built with Node.js, Express, and PostgreSQL, ensuring optimal performance and a smooth user experience.

VIAJES CHILE | [LINK](#)

JavaScript ES6+, Express, jQuery, HTML5, CSS3, Bootstrap 5.

Viajes Chile is a static website designed to offer a simple and efficient layout, ideal for any type of commercial project. Its flexible and modern structure adapts seamlessly to showcasing products and services. Built with Express, Node.js, HTML, and CSS, the site ensures a fast and smooth browsing experience, standing out for its simplicity and functionality. Viajes Chile provides a solid foundation for businesses looking to establish an attractive and user-friendly online presence.

FBI SYSTEM | [LINK](#)

JavaScript ES6+, Express, JWT, Json, Bootstrap, HTML5, CSS3

The application with JWT authentication is designed to securely list top-secret cases. Built with Express and Node.js on the backend and using JWT to ensure access is limited to authorized users, it provides a reliable platform for managing sensitive information. The interface, built with Bootstrap, is modern and responsive, ensuring an intuitive and secure user experience.

CLUB DEPORTIVO | LINK Node.js, Express.js, File System (fs/promises), JSON, JavaScript, HTML5, CSS3

Club Deportivo is an app that allows managing a sports catalog through CRUD operations on a JSON file. Built with Node.js, Express, and Bootstrap, it enables storing sports names and their prices in a simple and efficient way. The interface is intuitive, ensuring an easy-to-use experience for managing the data.

BLACK & WHITE | LINK Node.js, Express.js, Jimp, uuid, fs, JavaScript, HTML5, CSS3, Bootstrap, Popper.js

The app is a tool that converts image colors to grayscale. Developed with Node.js, Express, and Bootstrap, it uses the uuid library for generating unique identifiers, Jimp for image processing, and fs for file handling. This solution allows images to be transformed and saved in a simple format, providing a fast and efficient user experience.
